Turn your PC into a Thin Client – Easy, cost effective, safe!

- Cost Effective
- Top Security
- Ease of Management
- Full Control

What's the concept?

- convert any PC into Thin Client.
- Simply Place the component inside the PC instead of the hard disk in the PC or connect the USB stick externally.
- Reboot the PC and it starts up as a Thin Client.
- The PC is then centrally and remotely fully controlled and administrated.
- Applicable for old hardware up from 500 MHz processors with minimum 128 MB RAM.

Benefits

- Convert a PC into a Thin Client
- Extend hardware life time
- Support for PCs up from 500 MHz and 128 Mb RAM
- PC functionality in a thin client architecture
- Cost effective
- Super secure
- Remotely and centrally manageable

Why Chip PC

CHIP PC SOLUTIONS
